21st Century Schools Councils

The district supports site-based decision making through the implementation of 21st Century School Councils. The councils are intended to promote collaborative decision making in each of the district schools by community members, parents, students and staff. Shared decision making is regarded as a process, not an end in itself.

The purpose of site-based decision making shall be to enhance student academic achievement through improvement of the instructional program. Enhanced student achievement will be facilitated through the development of school improvement plans which focus on staff and program development.

The Board directs the superintendent to establish 21st Century Schools Councils in all district schools in accordance with Oregon's Educational Act for the 21st Century.
