

HIGH SCHOOL ESPORTS SYLLABUS

Welcome to high school Esports! In this class students will learn about the gaming industry and gaming skills. There will be a component of playing video games, but there is a set curriculum to be followed that encompasses all aspects of gaming. There will be assignments and quizzes that will count for points, just like any other class.

Esports is a booming industry that can offer many career paths in the future. It's nearly impossible to have a career in the gaming industry though, just by playing games. This class should open students' eyes to all aspects of gaming and what video games can help them achieve in their lives.

I am admittedly not a gamer myself, but the Gaming Concepts curriculum we are using is top notch and very easy to follow and use. There will be daily lessons and activities along with days mixed in where we'll get to practice game play in class.

It should be a fun time, and I'm hopeful its a benefit to all students! Gaming is great for mental health and I'm hopeful this class will give students something to be excited about coming to school each day.
