

# ***SPORTS MEDIA SYLLABUS***

Welcome! Sports media is a class designed to amplify our sports teams here at Eddyville. There are many different facets of this class, and students will be expected to produce various forms of content throughout the course of the year.

This includes creating graphics for social media, making videos, writing articles, and taking photographs all centered around our fantastic high school athletes and coaches here at school.

The class will start fast and furious as we are already in the midst of our fall sports season. We will settle into a nice weekly flow around the end of September, then gear up for our winter and spring sports seasons as they come.

Students will be given all the tools needed to be successful, along with any necessary support. Many times we will work in partners and groups to get things done, but students will need to be fairly self motivated as much of what we do is time sensitive (due to the nature of sports schedules).

Grades will be based on participation, quality of work, and effort. If students are clearly trying their best and keeping up, this should be a very simple class for them to get a grade they're satisfied with.

The one extra part of the grade will be to volunteer to "work" at two events per semester. Many times this is running the video jumbotron in the gym. Other times it may be capturing content at one of our sporting events (taking photos, videos, etc.). There will be plenty of volleyball, football, and basketball games in semester 1 to get this done. Often students are paired up to work at events so they can help each other out.

Please let me know if you have any questions or concerns at the email address below. Thank you so much, go Eagles!
